

ELAC signal lamp

LED signal lamp ELAC.

LED signal lamp with the possibility of mounting in several positions, with a built-in 433.92 MHz antenna.

Power supply 230 V, transparent, IP44 protection level.

Its additional advantage is the ability to be installed in several positions to fulfill functions specified by the user.

The lamp is made entirely of impact-resistant material, which guarantees use for many years. Its additional advantages include the built-in 433, 92 MHz antenna, which increases the operating range of the FLO/FLOR/ONE/SMILO/NICEWAY/INTI series remote controls.
