

BULL20

230 Vac |

230 Vac gear motor for intensive use, with magnetic limit switches, integrated control unit and encoder | Self-ventilated motor for more intense use | Oil lubricated metallic gear box to ensure maximum performance even at low temperatures | Thanks to the characteristics of the new electric motor, this product is particularly indicated for very intensive use | The encoder guarantees maximum safety and precision while the gate is moving |

Foundation plate with anchor bolts included.
